PORTFOLIO ADDENDUM

This addendum is a general portfolio companion for applications across analytics, business intelligence, business analysis, operations, revenue, and technical project roles. It highlights how I approach data, reporting, systems work, and decision support across sports, commercial, and internal business contexts.

ACADEMIC SUMMARY

Student with experience translating coursework, internships, and applied projects into reporting, dashboard, and systems-oriented work. Background includes business, analytics, and technical project execution across both classroom and professional settings.

ATHLETIC SUMMARY

Former professional and Division I soccer player with experience in high-performance team environments, disciplined preparation, and stakeholder-facing settings where consistency, accountability, and decision-making under pressure matter.

PROFESSIONAL SNAPSHOT

Core work style: analytical, structured, and implementation-minded, with a focus on turning raw data into decisions and usable outputs.

Strongest functional areas: business intelligence, reporting, dashboard design, commercial analysis, and process-oriented systems work.

Relevant data exposure: CRM, ticketing, consumer, partnership, survey, player, and operational datasets.

Best-fit roles: BI Analyst, Data Analyst, Business Analyst, Reporting Analyst, Revenue Analyst, Operations Analyst

Core tools: SQL, Excel, Tableau, Power BI, Python, Java, JavaScript, SharePoint

SELECTED METRICS

38
pro teams analyzed

850+
league matches reviewed

20,000+
player records analyzed

20+
executive-ready reports

RELEVANT PROJECT WORK

USL League Two League-Wide Analysis

SQL | PYTHON | REPORTING

LARGE-SCALE SPORTS ANALYTICS AND DECISION-SUPPORT WORK

- Reviewed 850+ matches and 4,500+ players to extract scouting and player-pathway insight.
- Used SQL and Python to move from raw league data to structured findings.
- Delivered presentation-ready output for recruitment, development, and pathway conversations.

Corporate Partnerships Target Revenue

TABLEAU | REVENUE PLANNING

COMMERCIAL MODELING AND SCENARIO-BASED PLANNING

- Built a multi-year partnership revenue model with adjustable assumptions and asset mix.
- Turned pricing and commercial logic into a cleaner planning framework.
- Relevant to broader revenue analysis, commercial strategy support, and scenario modeling.

Coaching Decision Research Dashboard

DASHBOARD | DECISION SUPPORT

EXECUTIVE-FACING ANALYSIS AND BROWSER-BASED REVIEW WORKFLOWS

- Built a multi-page dashboard to support retention, transition, hiring, and comparison decisions.
- Structured the work for front-office review rather than static analysis.

- Shows how I organize information so a stakeholder can act on it quickly.

Seaview Crabshack CRM System

CRM | INTERNAL SYSTEMS

SYSTEMS THINKING, CUSTOMER DATA, AND WORKFLOW SUPPORT

- Built a CRM and marketing operations system to unify customer records and outreach processes.
- Relevant to business systems, internal tooling, and process-improvement work.
- Shows ownership beyond analysis alone, including workflow structure and execution support.

ADDITIONAL ANALYTICS AND DASHBOARD SCOPE

Tableau Dashboard Portfolio

SPORTS | COMMERCIAL | TICKETING

- Player lineage and pathway dashboards across the Super and W-League ecosystem.
- League table, points, and playoff projection dashboards across multiple competitions.
- Ticketing revenue modeling, average ticket price analysis, revenue-stream reporting, and club support survey dashboards.

EXPERIENCE HIGHLIGHTS

Business Intelligence Analyst, USL

INTERNSHIP EXPERIENCE

- Built Tableau dashboards across KPIs, player lineage, and roster analytics using 20,000+ player records and commercial data.
- Conducted SQL and Excel analysis across CRM, ticketing, and consumer datasets.
- Produced executive-ready reporting tied to commercial and operational questions.

USL Men’s Soccer Pathway Analyst

MAY 2025 - PRESENT

- Conducted roster and match analysis across 38 teams and delivered dashboards and visual reports to MLS and USL clubs.
- Shows comfort with large-scale analysis and stakeholder-facing output.

Software Engineer / IT Intern, W.R. Berkley

MAY 2024 - AUG 2024

- Built a B2B insurance rater application and supported underwriting site development.
- Adds evidence of structured problem solving, internal tooling work, and implementation support.

SharePoint Site Development Intern, Bright IT Services

MAY 2023 - MAY 2025

- Developed and deployed 10 SharePoint sites for 4 clients.
- Adds client delivery, information-architecture, and process-aware implementation experience.
