Resume

Profile

The strongest fit across this work is in business intelligence, analytics, reporting, and operations-oriented analyst roles. The portfolio combines sports analytics, commercial planning, CRM and ticketing analysis, and technical build work.

- Business Intelligence Analyst
- Data Analyst
- Business Analyst
- Revenue / Operations Analyst
- Sports Analytics

Selected metrics

38
pro teams analyzed

850+
league matches reviewed

20,000+
player records analyzed

20+
executive-ready reports

SELECTED WORK

Featured projects

The strongest case studies first, summarized for quick review.

USL League Two League-Wide Analysis

ANALYTICS

SQL, PYTHON, EXCEL, REPORTING

Season-wide analytics work turning raw league data into usable scouting and player-pathway insight.

- Reviewed 850+ matches and 4,500+ players.
- Used minute filters and mid-season versus full-season comparisons.
- Delivered presentation-ready findings for recruitment and development conversations.

Corporate Partnerships Target Revenue

TABLEAU

REVENUE PLANNING, SCENARIO MODELING

Commercial planning work in Tableau for modeling multi-year partnership targets and asset-level revenue mix.

- Built around adjustable first-year targets, annual growth, and planning horizon.
- Mapped revenue across sponsorship assets including branding, broadcast, digital, and entitlements.
- Created a cleaner planning artifact for executive and commercial review.

Coaching Decision Research Dashboard

APPLICATION

EXECUTIVE DASHBOARD, DECISION SUPPORT

A browser-based executive dashboard for coach evaluation, comparison, and decision support.

- Structured multi-page review flows around retention, transition, and hiring questions.
- Included ranked coach boards, compare workflows, and brief-style outputs.
- Built for front-office review rather than match-day operations.

TECHNICAL PROJECTS

Application and systems work

Supporting builds that show range beyond the main case studies.

Job Agent

IN PROGRESS

PYTHON, SQLITE, WORKFLOW DESIGN

A local workflow for job discovery, filtering, shortlist generation, and application tracking.

- Normalizes jobs from multiple sources into one schema.
- Maintains shortlist and review state in SQLite.
- Supports a dashboard-driven flow from discovery to application tracking.

Seaview Crabshack CRM System

LIVE DEMO

CRM, SQLITE, MARKETING OPERATIONS

A lightweight CRM and outreach system for unifying customer records and repeatable marketing workflows.

- Centralizes customer records, purchases, touchpoints, and imports.
- Supports segmentation, campaign planning, and export workflows.
- Built as an internal business operations layer rather than a full POS replacement.

Full project pages, live demos, and Tableau dashboard summaries are available on the live portfolio site: rohitthakur1103-cyber.github.io/project-experience

EXPERIENCE

Experience highlights

Business Intelligence Analyst, USL

INTERNSHIP EXPERIENCE

Built Tableau dashboards across league KPIs, player lineage, and roster analytics using 20,000+ player records and commercial data. Conducted SQL and Excel analysis across CRM, ticketing, and consumer datasets and produced executive-ready reporting.

USL Men's Soccer Pathway Analyst

MAY 2025 - PRESENT

Conducted roster and match analysis across 38 USL Championship and League One teams, evaluated 850+ League Two matches and 4,500+ players, and delivered dashboards and visual reports to MLS and USL clubs.

Software Engineer / IT Intern, W.R. Berkley

MAY 2024 - AUG 2024

Built a B2B insurance rater application, developed and tested an underwriting website, and supported technical incident resolution across internal systems.

SharePoint Site Development Intern, Bright IT Services

MAY 2023 - MAY 2025

Developed and deployed 10 SharePoint sites for 4 clients with custom layouts, responsive pages, modern themes, and workflow-aware structures.

ADDITIONAL SCOPE

Tableau dashboard work

Sports dashboards

- Player Lineage - Super & W-League
- Championship Points and Playoff Projections
- League One Points and Playoff Projections
- Super League Points and Playoff Projections
- Playoff Match Projections - Championship

Commercial dashboards

- Ticketing Revenue Modeling
- Revenue Streams Dashboard
- Club Performance & Support Survey
- Consumer Products - Knoxville
- Season to Single Game Ticket ATP
